Executive summary

01

Chips Category Review

- The Mainstream category of Young and Mid-age Singles/Couples have the highest spending of chips per purchase.
- The Older Families(Budget) have the highest frequency of purchase followed by Young Singles/Couples (Mainstream) and at last Retirees (Mainstream) contributing to a total 25% sales revenue.
- Chips Brand Kettle is the most purchased brand in all stores.
- Young and Mid-age Singles/Couples is the only segment having Doritos as the highest purchase brand while Smiths is for other segments.
- Most frequent chip size purchased is 175 gr followed by 150 gr size for all segments.
- Chips transactions increase a lot before Christmas which can be an advantage with the help of promotional offers.

02

Store Analysis

- Trial stores 77 and 86 have significant increase in total sales and number of customers during trial as compared to control store.
- Trial store 88 had increase as well but not as good as stores 77 and 86.

- The day with no transaction is a Christmas day that is when the store is closed hence there is a dip in sales on 25th December as shops were non-operational.
- Sales increase steadily as the Christmas day approaches and return again to early December sales level during New Year Eve.

- Sales mainly came from Budget - older families, Mainstream - young singles/couples, and Mainstream - retirees. In total, older customers buy more than younger customers. Non-premium customers buy more than premium customers.

1. Trial store 77: Control store 233
2. Trial store 86: Control store 155
3. Trial store 88: Control store 40
4. Both trial store 77 and 86 showed significant increase in Total Sales and Number of Customers during trial period. But not for trial store 88. Perhaps the client knows if there's anything about trial 88 that differs it from the other two trial.
5. Overall the trial showed positive significant result.
